

COVID-19 Clinic Sanitation Protocols:

Here at Josie's Laser & Electrolysis Clinic, we take COVID-19 very seriously, and it is per our sanitation protocols that we ensure all areas within the clinic will be disinfected to our highest standards.

- Clients will be booked in half hour intervals from one another, in order to ensure that all areas can be properly disinfected for each appointment.
- All areas will be properly wiped down and sterilized with *PREempt*™ Salon & Spa licensed Disinfectant products.
- There will only be a sheet of patient treatment paper and paper towel laid out on the treatment table, and will be replaced after each patient, as usual. This ensures that the sterilization process is much more accurate.

We thank you for your continuous patience and understanding, especially throughout these uncertain times. We are very happy to have you back in the clinic, and look forward to beginning, and or completing your treatments at our clinic.

Regards,

Josie's Laser & Electrolysis Clinic (CT).
